

Management Team Completes Acquisition of Recycle Design, LLC

ANDERSON, IN, April 2009 – “The current management team is pleased to announce that it completed the acquisition of Recycle Design, LLC from Avalanche Resources, LTD.

Recycle Design, founded in 1993, provides superior quality site furnishings that uniquely combine forward-thinking design with durable construction and environmentally responsible materials. The management team is committed to providing the same outstanding products at an exceptional value to its customers.

“It has been an honor to grow Recycle Design with Avalanche Resources, LTD & TriMax for the last two years,” said Ed Boutwell, CEO of Recycle Design. “The current management team understands the importance of offering a durable product that is environmentally responsible at an exceptional value to our customers and is excited about the future growth of the company.”

The company will add four new jobs initially with plans for expansion in the Anderson community. “We are pleased to add these new jobs in Anderson when the economy is struggling.” Renovations are underway at a new location that will double the production and warehouse facility.

Recycle Design site furnishings accentuate and enhance both outdoor and indoor spaces and provide many benefits to its customers, both environmentally and economically. Recycle Design products are made with post consumer recycled plastic, using HDPE plastic containers and recycled aluminum to provide a rugged, maintenance free product.

A Recycle Design park bench, picnic table, and waste receptacle will reuse over 1,500 milk jugs. Purchasing Recycle Design furnishings helps close the loop on the community’s recycling efforts.
